

These instructions are to ASSIST you in the Iveri Whitening process. As a Dental Professional use your discretion as each individual client is different and may require additional treatment.

Client should read and sign Iveri Whitening Consent Form.
For Optimum Results a Professional Cleaning is Recommended.

STEP 1

Application of Vitamin E Oil
Break Vitamin E Oil Applicator at Red Line
Apply Vitamin E Oil to Gingiva

STEP 2

Insertion of Gel-Lined Mouth Tray
Advise Client to Bite Gentle into Whitening Tray
Gel can be Maneuvered, if Clients teeth are tilted or rotated,
by applying Lite pressure to the tray with your fingers

STEP 3

LED Light
LED Light is placed in front of Gel Lined Tray
for 15-20 minutes

STEP 4

End of Procedure
Gel Lined tray is removed
Client can Rinse with water

Optional Step - Application of Liquid Dental Dam
May be Recommended for Multiple Back to Back Sessions.
